

iPogo vs Shungo vs PGSharp

Pokémon GO mod client cheat sheet — reviewed 28/08/2026 ·
locationspoofing.com/guides/ipogo-vs-shungo-vs-pgsharp

Criteria	iPogo	Shungo	PGSharp Rooted Edition
Licence price	Free / \$60 a year (VIP)	\$204 a year	Subscription (monthly)
Root required	Optional — far more durable with root	Yes	Optional — recommended
Joystick / auto-walk	Yes, with speed presets	Yes, plus scripted movement	Yes
IV and spawn overlay	Yes, on the map and in the encounter screen	Yes, with rule-based filtering	Yes
Auto-catch and auto-spin	VIP only	Yes — the core feature	Auto-walk and enhanced throws
Saved routes and teleport list	Yes — saved favourites and route playback	Yes — multi-stop scripted routes with timing control	Yes — saved routes and favourites
Remote raid tooling	Raid list and invite tooling (VIP)	Yes, including scheduled raid runs	Basic raid support
Works with Magisk 30.7 hiding	Yes, with the Pokémon GO denylist entry set	Yes, with Zygisk hiding configured	Yes, with Magisk hiding configured
Update cadence	Fast — usually within days of a game update	Steady, with a paid support channel	Frequent, with published release notes
Learning curve	Low	High — expect an evening of setup	Low

Pick in one line

iPogo	Default choice. \$60/yr, easiest setup, quick rebuilds after game updates.
Shungo	Only for scripted routes and rule-based automation. \$204/yr, highest risk pattern.
PGSharp Rooted Edition	Monthly billing, release notes, support desk. Root makes it durable.

Safety rules that apply to all three

- Install only from the developer's own site or Discord — repackaged APKs are the main malware route.
- Keep Magisk 30.7 Zygisk hiding and the Pokémon GO denylist entry intact after every update.
- Respect cooldowns: roughly two hours after an intercontinental jump, minutes for short hops.
- Use a secondary account. Spoofing breaks Niantic's Terms of Service and accounts do get banned.
- No lifetime licences. Anything sold as 'lifetime' stops validating.

LocationSpoofing.com sells rooted Android hardware preloaded with the free tiers of iPogo, PokeMod, Shungo, PGTools and PolygonX. We are not affiliated with Niantic, Nintendo or The Pokémon Company, and we do not sell ban immunity.
